

10.1 Multiple stores

1. Create stores in **Settings ? Stores ? New store**. Each store has its own hours, services, staff, menu and agenda (a new store comes with a blank weekly agenda to fill in).
2. Switch stores in the **store switcher** (the pill in the top corner). The active store is kept across sessions.
3. **Deleting** a store removes everything that belongs to it; that store's booking history is removed too (there's a clear warning). You can't delete the last store.
