

2.1 Store details

1. Go to **Settings ? Stores** and click **Edit** on the store.
2. Fill in **name, address, phone, email**.
3. **Map location (optional, recommended)**: click the map or drag the marker to the store's door. The coordinates make the address **clickable** on the public page — the customer taps it and Google Maps opens with directions.
4. **Active/Inactive**: an inactive store stops appearing on the public page and the switcher but keeps its history. Handy for a temporary closure.
5. Save.

“ ?  — Store edit page with the map picker (Leaflet/OpenStreetMap).
