

# 2.3 Opening hours

1. Go to **Store setup ? Hours**.
2. For each weekday, toggle **Open**.
3. Set **one or more ranges** per day. For a **lunch break**, create two ranges (e.g. `09:00-13:00` and `15:00-19:00`) with **+ Period**. The gap between them is closed.
4. Save. The system **validates** and blocks overlapping ranges.

“ ? `02-hours.png` — Weekly grid with two ranges on a day (lunch break). Hours

“ ? Bookable times (online and backoffice) come from **these** hours, intersected with each staff member's hours (2.8) and existing conflicts.
