

2.9 Menu

For businesses with a menu (e.g. restaurants), go to **Store setup ? Menu**:

1. Create **categories** (e.g. "Starters", "Mains", "Desserts").
2. Inside each, create **items** (name, description, price, **image** — uploaded and cropped in the editor).
3. Drag by the handle to **reorder** categories and items.

The menu can be shown on the public page (chapter 4) and is available for any agenda type.
